Top functions of the XENERGIE product line

The XENERGIE product line has wide applications and a number of benefits to which new are added. We can apply partner requirements to the development in a way that satisfies even their most challenging requirements. However, from the entire range of XENERGIE application we choose the **TOP 5 functions** which are appreciated the most by our partners.

Price calculation on the basis of historical profiles or invoice data about customers

Creation of trading books and extended reporting according to requirement

Stable support for multi-annual offers and virtual sample points

Extraordinarily secure approach to data with integration to an authorisation service

Automatic generation and press release management (offer, contract)

A couple of words about us

We are a supplier of solutions for energy trading, energy and industry. Our solutions are aimed at energy suppliers, who provide their services to end clients, energy traders and energy management in industry. We have been on the market for 27 years and the Chartis report has recently included us in the elite club of **TOP 25 global technology players** on modern energy markets.
